

Honey

Selected mounting - for PDF file. Velcro

Selected colour - for PDF file.  Black

Product description

HONEY polishing pad is an easier, faster and more enjoyable way to get the highest gloss of lacquer for the most demanding users. Foam structure maintains the paste on the surface of the pad what provides accurate developing of particles and full utilization of the paste. The edges of the hexagonal blocks reduce the time of bringing the paint to the ideal state. Cuts help to control the temperature. Dividing the working surface allows an easy operation with the entire pad. We recommend working with rotary machines in the rev range 600-2000rpm. Application: Anti-Hologram paste and mechanically applied polishes.

Type Honey

Name Velcro HONEYCombination Polishing Pad, Black

| Size | Index |
|--------------|-------------|
| 150mm x 50mm | PVHK1030150 |
| 150mm x 25mm | PVLK1030150 |
| 135mm x 25mm | PVLK1030135 |
| 125mm x 25mm | PVLK1030125 |

Product properties

Main product features.

Foam:

- Optimal selected shapes
- The homogeneous structure of high strength
- Specially shaped surface
- proper hardness

Mounting:

- Polyamide velor to ensure strong connection

Connection:

- Adhesive is matched individually to the bonded substrates.
- Resistance to temperature, aqueous environment and organic solvents

The product shows the resistance to prolonged exposure to temperatures up to 110 ° C

| Parameters | Value | Standard |
|------------------|-----------|-------------------|
| Density | 26 - 30 | kg/m ³ |
| Hardness 40% | 2 - 4 | kPa |
| Elongation | 350 | % |
| Tensile strength | 200 | kPa |
| Cell diameter | 440 - 520 | micron |
