

TECNICAL PRODUCT DATA TONER EFFETTI

100% water-based decorative effect

Toner effetti, available in the colours shown in the palette, has properly been studied for being added, with a simple mixing, to the ATF Base or, when appropriate, the ATF IRIDESCENTE. In this way, new suggestive decorative effects will be created, allowing the end user to express his own creativity in a complete manner.

Thanks to its particular composition based on resins and pigments having an advanced water-based technology and its highly selected additives, toner Effetti is perfectly and simply miscible, by a simply manual mixing, with the ATF Neutral Base or ATF IRIDESCENTE.

Toner Effetti appears as a series of floccules coloured according to the palette, is easy to pour and not flammable, being completely water-based, and is resistant to the bacterial attacks.

The addition rate to the Neutral Base is one 0.250 l toner Effetti per one 2.5 l ATF neutral base or ATF IRIDESCENTE can.

If the particular "COMETE" decoration is desired, the addition rate will be ½ toner Effetti per each effect colour (3 different colours, ½ toner in total) selected from the catalogue per one 2,5 l ATF or ATF IRIDESCENTE Neutral Base can.

PRODUCT CHARACTERISTICS

Package:	0.250 liters
Specific weight:	1 – 1.04
pH:	6.5 – 7.5
Viscosity:	2,000-5,000 cps at 25°C
Drying time:	partial: 2-3 hours total: 1- 2 days. It can be washed after 20-25 days

Minimum processing temperature: + 5°C

Surface adhesion:	Excellent on well prepared surfaces
Aspect of the product:	Opaque. Coloured in the palette colours
Hardness:	When the toner is combined with the ATF neutral base or ATF IRIDESCENTE and is perfectly applied and dried, the product offers a good rubbing resistance.
Aging resistance:	Very good.
Abrasion resistance:	DIN 53778 S, more than 4000 abrasive cycles.
Water resistance:	The product applied at 90-100 g/m ² has a washability of more than 4000 Gardner cycles, certified by the Product Laboratory of C.C.I.A.A. of Rome.
Permeability:	Excellent.
Dilution:	READY MADE
Washability:	Good.
Pest resistance:	There are no contamination signs caused by bacteria, yeasts or fungi after incubation with the EASICULT test.
Storage:	The product can be stored at a minimum temperature of +5°C.
Cleaning:	When completely dry, it can be cleaned with water using a sponge.
Flammability:	the product is completely free of flammable solvent and totally in aqueous phase.
V.O.C. regulation:	Water-based L subclass. V.O.C. maximum limit allowed: 200 g/l V.O.C. content in the product : less than 50 g/l
