

## **ELISIR**

### **TECHNICAL SPECIFICATIONS**

With Elisir, Candis intends to propose to the sector of wall paintings with decorative effect a novelty of prestige, economically very interesting and a great simplicity of implementation.

Entirely in aqueous phase, Elisir is a decoration product directly applicable, in a single layer and which requires no long and painful preparation of the support.

Elisir was created to allow all users to prestigiously enrich the walls of their interiors with a few brushstrokes very easily and very quickly and thus obtain in a record time a unique atmosphere of great aesthetic value.

Candis, the world leader in decoration products, recommends putting Elisir to the test: a decorative choice that can enhance all interiors with regard to a contained expense. Elisir expresses fully the notion of Italian beauty and style. Thanks to Elisir, each one has the possibility of obtaining a decorative result with impeccable aesthetics, simple to realize, trendy and very creative.

Pour the toner or toners into the Elisir jar and shake the contents until the color is homogeneous.

The wall to be colored must be preventively prepared with 2 layers of Fondo ATF Bianco, the first layer diluted with 20% - 25% water, the second layer 15% - 20%.

Candis strongly recommends using its own sub-layers of preparation because they allow a better valorization of the aesthetic aspect and guarantee the compatibility of the products between the different layers. In case of use of underlayers of other marks, Candis can not be held responsible for unsatisfactory final results.

On the perfectly dry wall, apply Elisir in the chosen tone, in a single layer, making crossed movements and simply stretching the product with the Candis brush. It is not necessary to pass a second layer, to make alterations or to pass other instruments.

Before starting work it is advisable to carry out a test on a small surface. After addition of the dye and before application, it is also recommended to thoroughly mix batches of different paints.

The decorative product must not be diluted. It is ready for use. Keep out of reach of children.

Shake product before use.

The color samples presented in this catalog were produced using the "print on real" printing system.

Candis can not be held liable in the event of misuse of the product. The user is solely responsible for the decorative results and Candis does not respond to possible differences in color between the color shown on the color chart and the result obtained.

PACKAGING: cans of 10 l and 2.5 l INDICATIVE RETURN: 6 - 10 m<sup>2</sup> / l

SPECIFIC WEIGHT: 1.1 - 1.2

O.V. OF PRODUCT READY FOR USE: limit value 200 g / l.

C.O.V. In the product of less than 60 g / l.

DRYING: to touch 2-3 hours COMPLETE POLYMERIZATION: 20 - 25 days pH: 6.5 - 8.5

VISCOSITY: 6000 - 8000 CP at 25 ° C

DILUTION: ready for use

STORAGE AND USE TEMPERATURE: Minimum + 7 ° C Maximum + 35 ° C

FLAMMABILITY: completely free of flammable solvents, totally in aqueous phase. WALL CLEANING: with a small sponge using water at least one month after application. CLEAN TOOLS: Wash with warm water.

During application follow the normal rules of occupational hygiene and safeguard of health.
