

TECNICAL DATA SHEET

AS-1001A-100 IMPREGNATE CONCRETE PRIMER

Product Description:

Protects against corrosion in reinforced concrete structures are transparent impregnating material. Epoxy resin-based, solvent penetrates the surface it is applied to the concrete reinforcement corrosion will defer the start. Self Leveling Epoxy Solvent-free coating to be applied over and prepares the ground.

General Use:

Both underground and aboveground structures and equipment to prevent corrosion of the concrete surface

- Eyes that can not be detected with the corrosion in the maintenance and repair of buildings
- A esthetic and prefabrika featured buildings for protection against water and moisture in buildings lining material.

Drying Time

Dry Time 20°C	Powder Dry	Hard Dry
	45-60 min.	4-6 h

Application:

1 part by weight of Comp (AS-1001)., 1 part B Comp. (AS-1001B) is given, and a very good mixing pot life (pot life), which should be consumed within 4-6 hours. Should be prepared to use much paint should be consumed in a short time. Surface dust, dirt, oil is thoroughly cleaned. Is applied with a roller on the floor. After 4-6 hours applied epoxy floor coating systems applied.

Shelf life 1 years in unopened package
