

PRODUCT INFORMATION

Date of issue: 22.10.2020

Lubricator**Application area:**

Lubricant especially to use with the Polytop Prepa Pad.

Product description:

The Polytop Lubricator is a solvent-free lubricant which is developed for the use with the Polytop Prepa Pad. So the complete cleaning power is utilized and formation of scratches are prevented. The combination of active ingredients dissolve the contamination, but the special honeycomb structure of the Prepa Pad is not glued.

Additional information:

Do not apply on hot paint surfaces. Shake well before use! Reserved for industrial and professional use. Keep out of reach of children. Safety data sheet available under www.polytop.de.

Density:

1,00

Art. no.:47500010
47500500**Pack size:**10 Liter
0,5 Liter**Features:**

- high cleaning power
- preserves the coating
- prevents scratch-formation

Application:

Wash the vehicle to dissolve loose dirt and dust. Fix the Polytop Prepa Pad via polishing plate onto the polishing machine. Spray the Polytop Lubricator onto the paint surface and the Prepa Pad. Put the polishing machine onto the paint surface and treat with slight pressure at a speed of approx. 1,000 r.p.m. Remove the residue with a soft microfiber cloth.

Ingredients:

EC 648/2004: fragrances, preservatives (PHENOXETOL, LAURYLAMINE DIPROPYLENEDIAMINE, BUTYLBENZISOTHIAZOLINONE), dye, additional information: synthetic polymers

Hazardous informations:
