

## Stella - water based multi surface paint Pure acrylic

It is water-based, pure acrylic-based, new generation transformation paint with excellent adhesion to all surfaces.

### Areas of Use

It can be applied on all kinds of wood, furniture, parquet, laminate, ceramic, tile, marble, glass, plastic, metal, aluminum, galvanized, zinc, porcelain, fabric, stone, paper, cardboard.

### Specifications

- Hiding power is very high.
- It has excellent water resistance. Since it has very good water resistance, it also provides water proofing on the applied surface.
- It has high chemical resistance (soap, dishwashing liquid, shampoo, etc.).
- It does not leave any brush or roller marks as it is very spreading, it gives the user the desired time for necessary corrections.
- It does not require an additional application of Liquid glass thanks to its bright appearance after application.
- It has high adhesion strength, does not require any primer.
- It is dirt and stain resistant and can be easily cleaned with a wet and soapy cloth.
- Perfumed, does not have an irritating odor.
- Since it is resistant to water and chemicals, it does not require an additional Liquid glass protective application (except for places where contact with water is high and the ground).
- It is suitable for use in all indoor and outdoor spaces.
- It has unlimited color options.

### Application

The application surface must be absolutely clean. The surface should be free from all factors such as dust, dirt, oil that will reduce the adhesion of the paint to the surface, and sandpaper should be done when necessary. It does not require any primer use before application. If it will be applied on metal surfaces, it is recommended to prime the surface with anticorrosion primer in order to prevent corrosion. After opening the Bianca Stella package, it is mixed until a homogeneous consistency is obtained. The product is applied to the necessary pre-prepared surface in 2 layers without diluting with a silk brush, velvet roller or spray. **Between floors min. it should be waited for 3-4 hours.** Care should be taken to keep the applied surface and ambient temperature between +5°C and +30°C during the application.

### Protection with Liquid Glass

It is recommended to use Stella Water-Based Liquid Glass or Maximo Solvent-Based Liquid Glass for the protection of surfaces such as parquet, laminate, floor tiles, tables, where physical activity is present, 24 hours after the Stella Paint application is completed. Maximo Solvent Based Liquid Glass should be used, especially on surfaces such as kitchen countertops.

### Thinning (Volume)

Ready to use. Mix before application.

### Drying Period (20°C)

**Touch Drying:** 1 - 2 hours. **Final drying:** 24 hours. Application surfaces should not be used for 1 day, and surfaces exposed to water should not be used for 2 days. Water should not be allowed to accumulate for the first 7 days and should be protected against impacts. **Do not perform scratch tests on the applied product for at least 7 days, which are necessary for the product to dry completely.**

### Coverage

With 1 lt, depending on the application method and the floor, an area of 10 -12m<sup>2</sup> can be painted on a double layer.

### Storage

2 years at room temperature in its unopened original package.

### Packing

0,50 lt/ 1,00 lt

### Health, Safety and Environment

- While applying paint wear eye protective glasses
- In case of contact with eyes, rinse immediately with plenty of water and seek medical advice.
- Ensure maximum ventilation during application and drying.
- Keep container tightly closed and keep out of reach of children.
- Protect from frost and extreme temperature.
- Do not pour the remaining paint into the sink and toilet.
- Clean paint brush and roller with water after each application.
- Ensure this pack is stored upright and secure during transportation.
