Safety Data Sheets

According to Annex II of REACH – Regulation (EU) 2020/878

SECTION 1. Identification of the substance/mixture and of the company/undertaking

1.1. Product ID

Product Name	**DECOMELT 4050**
Chemical name and synonyms	**Hot melt hot melt adhesive based on EVA**

1.2. Identified uses of the substance or mixture that are relevant and uses that are not recommended

Application Description	**Hot melt Hot Melt Glue For Woodworking**

1.3. Details of the safety data sheet provider

Company Name	**Orgachem Kimya San. Ve Tic. A.S.**
Full address	**Ist. End. Serb.Blg. Ataturk Boulevard 6. Street No. 117/3 Aydinli**
Location and country	**3495Istanbul, Turkey**
	Wire. +90 216 394 25 29
	Fax +90 216 394 21 21

Importer : Ada Color Ltd.
Ul. 176 Brezovsko Shose Street,
4003 Plovdiv, Bulgaria
Mobile: +359896663052
Tel: +35932940456
Fax +35932940457
Web: adacolor-bg.com

4.1. Emergency phone number Additional information: Bulgaria:
Toxicology Clinic at the Pirogov Hospital for Active Treatment
Emergency phone:
+359 02 9154 409 (within normal business hours, excluding weekends)
+359 02 9154 346 (non-stop service)

SECTION 2. Hazard description

2.1. Classification of the substance or mixture
The product is not classified as hazardous under the provisions of Regulation (EC) 1272/2008 (CLP) (and subsequent amendments and corrections).
Hazard classification and designation: --
2.2. Label elements

Hazard pictograms:	--
Signal words:	--
Hazard Warnings:	--
Safety recommendations:	--

2.3. *Other* dangers

Based on the available data, it is evident that the product does not contain PBT or vPvB substances at a rate ≥ of 0,1%.
The product does not contain substances with endocrine disrupting properties with a concentration of >=0.1%.
Danger: Heated material can cause heat burns

SECTION 3. Ingredients/Ingredient Information

3.1. Substances

Irrelevant information

3.2. Mixtures

The product does not contain substances classified as hazardous to health or the environment under the provisions of Regulation (EC) 1272/2008 (CLP) (and subsequent amendments and corrections) in quantities requiring declaration.

SECTION 4. First aid measures

4.1. Description of first aid measures

EYES: Eliminate possible contact lenses. Wash immediately and thoroughly with water for at least 15 minutes, opening the eyelids well. If the problem persists, consult a doctor.
SKIN: Remove contaminated clothing. Rinse slowly and thoroughly with water. If irritation persists, consult a doctor. Before new use, dirty clothes should be washed.
INHALATION: Take the subject to fresh air. If breathing is difficult, call a doctor immediately.
INGESTION: Consult a doctor immediately. Induce vomiting only with a doctor's prescription. If the subject is unconscious or if there is no doctor's prescription, do not give anything oral.

4.2. The most significant acute symptoms and effects occurring after a certain period of time

No information available

4.3. Indication of the need for any emergency medical care and special treatment

No information available

SECTION 5. Fire prevention measures

5.1. Fire extinguishers

SUITABLE EXTINGUISHING AGENTS
The extinguishing agents are the traditional ones: carbon dioxide, foam, dust and nebulized water.
INAPPROPRIATE EXTINGUISHING AGENTS
None in particular.

5.2. Particular hazards arising from the substance or mixture

HAZARDS OF EXPOSURE TO SUCHAI FIRE
Avoid inhalation of products resulting from ignition.

5.3. Tips for firefighters

BACKGROUND
Cool the dishes with a water jet to avoid degradation of the product and the formation of potentially hazardous substances. Always wear full protective firefighting equipment. Collect the water used to extinguish the fire, which should not be poured down the drain. The contaminated water used in extinguishing the fire and fire should be disposed of in accordance with the current regulations.
EQUIPPING
Normal firefighting clothing, such as one open-chain compressed air respirator (EN 137), fire kit (EN469), fire gloves (EN 659) and firefighting boots (HO A29 or A30).

SECTION 6. Emergency release measures

6.1. Personal precautions, protective equipment and emergency procedures

In the absence of contraindications, avoid the formation of dust by spraying the product with water.
Use appropriate protective equipment (including personal protective equipment specified in Section 8 of the Safety Data Sheet) to avoid contact with skin and eyes and contamination of personal clothing. These guidelines apply to both product handlers and emergency interventions.

6.2. Precautions to protect the environment

Do not allow the product to enter sewers, surface waters, groundwater.

6.3. Methods and materials for restraint and cleaning

Collect a product and place it in containers for its collection or disposal. The residue should be removed with a water jet, if there are no contraindications.
Carry out the necessary ventilation of the room where the product was spilled. Assess the compatibility of the container to be used for the product by checking Section 10. The disposal of the contaminated material must be carried out in accordance with the provisions in item 13.

6.4. Reference to other sections

Any information regarding personal protective equipment and waste disposal is given in Sections 8 and 13.

SECTION 7. Operation and storage

7.1. Precautions for safe operation

Operate the product only after you have read all other sections of this safety cardboard. Avoid spraying the product into the environment. Do not eat, drink or smoke during the use of the product. Remove contaminated clothing and protective equipment before going to the dining areas.

7.2. Safe storage conditions, including incompatibilities

Store only in the original containers. Store in closed containers, in a well-ventilated place, away from direct sunlight. Containers should be stored away from possibly incompatible materials, consult section 10.

Store in a dry and cool place, preferably between 10 ° C and 30 ° C. Keep away from heat sources and close containers after use to prevent dust contamination. The product can be stored for a minimum of 24 months under the recommended storage conditions.

7.3. Specific end-use(s)

No information available

SECTION 8. Exposure control/personal protective equipment

8.1. Control parameters

No information available

8.2. Exposure control

Given that the use of appropriate technical measures should always take precedence over the use of personal protective equipment, ensure good ventilation in the workplace through efficient local aspiration.
HAND PROTECTION
Protect hands with work gloves category III (according to EN 374).
When making the final choice of material for work gloves, consider: compatibility, degradation, breakage and penetration time.
In the case of handling detergents, the durability of the work gloves must be checked before use, as it cannot be predicted. Gloves have a wear time, which depends on the duration and how they are used.
SKIN PROTECTION
Wear long-sleeved work clothes and safety shoes for professional use of category I (according to Regulation 2016/425 and EN ISO 20344).
Wash with soap and water after removing protective clothing.
EYE PROTECTION
The use of airtight safety glasses (according to EN 166) is recommended. RESPIRATORY
PROTECTION
In case of exceeding the threshold value (e.g. TLV-TWA) of the substance or of one or more substances present in the product, we advise the use of a mask with a type A filter, the class (1, 2 or 3) of which must be selected depending on the limit concentration of use. (according to EN 14387). In case there are gases or vapors of different nature and/or gases or vapors with particles (aerosol, smoke, fogs, etc.), it is necessary to use combined filters. The use of respiratory protective equipment is necessary in case the technical measures taken are not sufficient to limit the worker's exposure to the threshold values taken into account. The protection provided by the masks is limited.
In the event that the substance in question is odourless or its olfative threshold is greater than the corresponding TLV-TWA, and in the event of an emergency, insert an open-circuit self-contained compressed air breathing apparatus (see EN 137) or an external air intake breathing apparatus (see EN 138). For the right choice of respiratory protective equipment, refer to EN 529.
ENVIRONMENTAL EXPOSURE VERIFICATION
Emissions from manufacturing processes, including those from ventilation systems, must be controlled in order to comply with environmental regulations.

GLOVE TYPE: Nitrile rubber, penetration time> 480 minutes, glove thickness 0.1 - 0.4 mm.

SECTION 9. Physical and chemical properties

9.1. Information on basic physical and chemical properties

Properties		Value	Information
Physical aspect		granular	
Colour		Opac off-white	
Smell		Characteristic	
Odor limit		Not applicable	
Melting point / freezing point		Indefinite Boiling	
Point		Not applicable	
Boiling interval		Unspecified	
Zapalimost		Unignited	
Lower Limit Explosion		Not applicable	
Upper limit explosion		Not applicable	
Ignition point	>	250 °C Self-	
ignition temperature		Unspecified	
Decay temperature		Unspecified	
pH		Not applicable	
Kinematic viscosity		Missing	
Dynamic viscosity		31000 mPa.s at 220°C	
Solubility		Insoluble in water	
Distribution coefficient:			
n-octanol/water		Not applicable	
Vapor pressure		Not applicable	
Relative Density of Money		Not applicable	
Characteristics of particles		Missing	

9.2. Other information

9.2.1. Information on physical hazard classes

No information available

9.2.2. Other safety features

Evaporation rate	Not applicable
Molecular Weight g/mol	Not applicable
Total dry matter	100.00 %
Explosive properties	is not explosive
Oxidizer properties	non-oxidizing
Melting range	150 - 200 °C

SECTION 10. Stability and reactivity

10.1. Reactivity

Under normal conditions of use, there are no particular dangers of reaction with other substances.

10.2. Chemical stability

The product is stable under normal conditions of use and storage.

10.3. Possibility of dangerous reactions

Under normal conditions of use and storage, no dangerous reactions are foreseen.

10.4. Conditions to avoid

Not one in particular. Use the usual caution when handling chemical products.

10.5. Incompatible materials

No information available

10.6. Hazardous decay products

No information available

SECTION 11. Toxicological information

There are no known cases of health damage when exposed to the product. It is recommended to work in compliance with the rules of good industrial hygiene.

11.1. Information on the hazard classes set out in Regulation (EC) No 1272/2008

Metabolism, toxicokinetics, mechanism of action and other information No information

available

Information on likely routes of exposure No information

available

Immediate effects occurring after a certain period of time, as well as chronic consequences of short-term and long-term exposure

No information available

Interactions

No information available

ACUTE TOXICITY

ATE (Inhalation) of the mixture:	Unclassified (no significant component)
ATE (oral) of the mixture:	Unclassified (no significant component)
ATE (Leather) of the mixture:	Unclassified (no significant component)

SKIN CORROSION / IRRITATION

Does not meet the classification criteria for this hazard class SERIOUS EYE

DAMAGE / EYE IRRITATION

Does not meet the classification criteria for this hazard class RESPIRATORY

OR SKIN SENSITIZATION

Does not meet the classification criteria for this hazard class

Respiratory sensitization

No information available

Dermal sensitization No

information available

GERM CELL MUTAGENICITY

Does not meet the classification criteria for this hazard class

CARCINOGENICITY

Does not meet the classification criteria for this hazard class

REPRODUCTIVE TOXICITY

Does not meet the classification criteria for this hazard class Harmful effects

on sexual function and fertility No information available

Harmful effects on the development of offspring

SECTION 11. Toxicological information ... / >>

No information available Effects on

or through lactation No information

available

SPECIFIC ORGAN TOXICITY - SINGLE EXPOSURE

Does not meet the classification criteria for this hazard class Certain bodies

No information available

Method of exposure

No information available

SPECIFIC ORGAN TOXICITY - REPEATED EXPOSURE

Does not meet the classification criteria for this hazard class Certain bodies

No information available

Method of exposure

No information available

INHALATION HAZARD

Does not meet the classification criteria for this hazard class

11.2. Information on other hazards

Based on the available data, the product does not contain substances included in the main European lists of potential or suspected endocrine disruptors affecting human health that are under evaluation.

SECTION 12. Environmental information

To be used, according to normal working practice, avoiding the disposal of the product into the environment. Notify the competent authorities in case the product reaches water sources or if it has contaminated the soil and/or vegetation.

12.1. Toxicity

No information available

12.2. Durability and degradability

No information available

12.3. Bioaccumulative capacity

No information available

12.4. Soil Portability

No information available

12.5. PBT and vPvB assessment results

Based on the available data, it is evident that the product does not contain PBT or vPvB substances at a rate ≥ of 0,1%.

12.6. Endocrine disrupting properties

Based on the available data, the product does not contain substances included in the main European lists of potential or

SECTION 12. Environmental information ... / >>

suspected endocrine disruptors affecting the environment that are being assessed.

12.7. Other adverse effects

No information available

SECTION 13. Waste disposal

13.1. Waste treatment methods

If possible, reuse. Product residues should be considered as special but not hazardous waste materials.
The disposal of the product must be undertaken by a specialized company authorized to handle waste materials in accordance with national and local regulations.
For solid waste, the disposal of a specialized landfill should be envisaged. SOILED
PACKAGING
Contaminated packaging should be sent for recycling or disposal in accordance with national waste material treatment regulations.

SECTION 14. Transport information

The product is not considered dangerous according to the regulations in force regarding the road (A.D.R.), rail (RID), sea (IMDG) and air (IATA) transport of dangerous goods.

14.1. UN List Number or Identification Number

Not applicable

14.2. Exact name of the consignment on the UN list

Not applicable

14.3. Transport hazard class(s)

Not applicable

14.4. Packaging Group

Not applicable

14.5. Environmental hazards

Not applicable

14.6. Special precautions for consumers

Not applicable

14.7. Maritime transport of bulk cargo according to International Maritime Organization instruments

Irrelevant information

SECTION 15. Regulatory information

15.1. Substance- or mixture-specific safety, health and environmental legislation/legislation

Seveso Category - Directive 2012/18/EC: Any

Restrictions on the product or on the substances contained, according to Annex XVII Regulation (EC) 1907/2006

Regulation (EU) 2019/1148 - on the marketing and use of explosives precursors

SECTION 15. Regulatory information ... / >>

Not applicable

Substances in Candidate Lis (Art. 59 REACH)
Based on the available data, it appears that the product does not contain SVHC substances at a rate ≥ of 0,1%.

Substances subject to authorisation (Annex XIV REACH) None

Substances subject to the export notification obligation Regulation (EC) 649/2012: None

Substances subject to the Rotterdam Convention:
Any

Substances subject to the Stockholm Convention None

Sanitary checks
No information available

15.2. Safety assessment of a chemical substance or mixture

No safety assessment of the preparation/substances referred to in section 3 has been carried out.

SECTION 16. Other information

LEGEND:
- ADR: European Agreement on the Transport of Dangerous Goods by Road.
- CAS: Номер на Chemical Abstract Service
- CE50: Concentration that affects 50% of the population to be tested
- CE: ESIS (European Archive of Existing Substances) identification number
- CLP: Regulation (EC) 1272/2008
- DNEL: Derived level without impact
- EmS: Emergency Schedule
- GHS: Globally Harmonized System of Classification and Labelling of Chemical Products
- IATA DGR: International Air Transport Association Dangerous Goods Regulations
- IC50: Concentration of immobilization of 50% of the population to be tested
- IMDG: International Maritime Code for the Transport of Dangerous Goods
- IMO: International Maritime Organization
- INDEX: Identification number in Annex VI of CLP
- LC50: Lethal concentration 50%
- LD50: Lethal dose 50%
- OEL: Professional Exposure Degree
- OOT: Acute toxicity assessment
- PBT: Persistent, bioaccumulative and toxic according to REACH
- PEC: Foreseeable concentration in the environment
- PEL: Predictable Exposure Level
- PNEC: Predictable concentration without consequences
- REACH: Regulation (EC) 1907/2006
- RID: Regulations for the International Transport of Dangerous Goods by Train
- TLV: Cut-off value
- TLV MAXIMUM VALUE: Concentration that should not be passed at any point during exposure during operation.
- TWA: Weighted Average Exposure Limit
- TWA STEL: Short-Term Exposure Limit
- VOC: Volatile Organic Compound
- vPvB: Very persistent and highly bioaccumulative according to REACH
- WGK: Water hazard classes (Germany).

Note to the user:
The information contained in this manual is based on knowledge we have up to the date of the latest version. The user must be convinced of the accuracy and completeness of the information depending on the type of use of the product. This document should not be considered as a guarantee regarding the specific properties of the product.
As the use of the product is not under our direct control, the User is obliged to comply at his own risk with the Law and the current regulations in relation to hygiene and safety. No responsibility is taken for improper use of the product.
Provide appropriate information for personnel working on the use of chemical products.

CALCULATION METHODS FOR CLASSIFICATION
Chemical and Physical Hazards: Product classification is based on criteria established by the Classification, Labelling and Packaging (CLP) Regulation, Annex I, Part 2. The data for the assessment of chemical and physical properties are referred to in Article 9.
Health hazards: The classification of the product shall be based on calculation methods according to Annex I of CLP, Part 3, unless otherwise specified in Section 11.
Environmental hazards: The classification of the product shall be based on calculation methods according to Annex I of CLP, Part 4, unless otherwise specified in Section 12.
Changes compared to the previous edition:
Changes have been made in the following parts:
01 / 02 / 03 / 04 / 06 / 07 / 08 / 09 / 11 / 12 / 15 / 16.
